Summary

As an advanced Systems Engineering student, I am eager to obtain relevant job experience that aligns with my career goals. I am interested in positions that have a global impact on the company, or ones that connect different sectors, such as the ones of Project Manager, Delivery Manager, Product Owner, and Business Analyst. I have certifications in Agile Methodologies, Atlassian tools, and different software for Data Analysis and Project Management.
I have great communication skills, which are fundamental in my positions of interest. My main goal is to ensure that all my co-workers are performing the best they can.
I am bilingual, a native Spanish speaker with advanced proficiency in English. You can find my LinkedIn profile available in both languages, as well as this resume.

Education

SANTA MARIA SCHOOL   3/2009 - 11/2011
High School
Average 8/10

UTN FRD   3/2014 - Ongoing

Experience

SR PROJECT MANAGER   02/2025 - 06/2025
Bigger IT

I worked as a SR Project Manager for Bigger IT, an australian-based software factory mainly focused on blockchain projects and Stellar Network integrations.

PROJECT MANAGER   08/2024 - 11/2024
WERDEN IT

I worked as a Project Manager in a software factory. I was hired to work, from beginning to end, on two standalone projects while covering some responsibilities of a Product Owner, Scrum Master, and Business Analyst.
Some of my responsibilities were:

- Project tracking.

- Daily presentations with either stakeholders or clients.

- Requirements' definition.

- Workflows and templates optimizing.

- Weekly alignment calls with different teams.

PROJECT ANALYST
01/2024 - 03/2024
HANSEN Technologies

I worked as a Project Analyst for HANSEN Technologies, an Australian billing company. It was a remote position spoken entirely in English.
Some of my responsibilities were:

- Project tracking and analysis.

- Requirements definition.

- Data analysis, both with the Office Package and the company's software.

- Workflows optimizing, using Jira.

- Creation of new documents connected with the Atlassian tools.

- Daily stakeholder presentations.

- Weekly alignment calls with different teams.

PROJECT ADMINISTRATOR
06/2023 - 01/2024
PwC Acceleration Center Argentina

I worked as a Project Administrator / Coordinator for PwC, one of the top 4 accounting firms worlwide.
Some of my responsibilities were:

- Data Analysis

- Document Delivery and Tracking

- Presentations to the Stakeholders.

- Template creation and improvement.

- Weekly calls with the Project Management team.

DELIVERY MANAGER -> PROJECT MANAGER
10/2022 - 04/2023
Correo Argentino

I started working as a Delivery Manager in Correo Argentino, with the following responsibilities:

- Analyzing technical requirements for internal and external systems.

- Tracking and prioritizing requirements from different work areas.

- Generating reports in Jira/Confluence.

- Managing budget demands.

In January, I was promoted to Project Manager. I started taking new projects and speaking with the different stakeholders of each area. Some of my responsibilities were:

- Generating and presenting reports to the stakeholders.

- Defining user requirements.

- Making viability analysis.

- Creating roadmaps for change management and new implementations.

- Improvement proposals.

BUSINESS ANALYST

2/2022 - 5/2022
OSPe

I worked as a Business Analyst for OSPe, a social security company.
My responsibilities included:

- Gathering, formalizing and communicating user requirements.
- Facilitating meetings with clients and the development team.
- Tracking project tasks and progress.
- Making improvement proposals.
- Functional testing.

DEVELOPER / BUSINESS ANALYST

5/2021 - 7/2021
Freelance

For my first standalone project I developed a Progressive Web Application for the Stock Control of a small company. The project took 7 weeks, after which I continued doing apps for other small companies. Besides programming, I was in charge of:

- Stabilishing and refining the roadmap.
- Writing the documentation.
- Prototyping.
- Weekly presentations with the clients.
- Testing.

MANAGEMENT & DATA ANALYSIS TOOLS

- Jira
- Confluence
- Trello
- Office 365
- Azure DevOps
- Power BI
- ServiceNow
- Service Manager
- ClickUp
- Tableau
